Basically, we are a leading Salesforce Software Development company which has more than 3 years' experience. Along with, we provide better CRM services according to industry and client requirements based.

IOT Development

We provide end-to-end IoT solutions, providing world-class solutions developed in-house. Our solutions are based on the Connect, Collect and Consume model; from sensors, to connectivity to web/mobile apps for monitoring, alerting, reporting and analytics of connected devices or “Things”.

Web Development

Strengthen your foothold in the online world with help of our core expertise in advanced web development technology. Our multifaceted & prolific approach will carve a unique image of your business that tends to make your brand famous and renowned worldwide.

Design / Markup

We completely understand your business category and create a web design, which is according to your requirements and lets you stand apart from the crowd. Our designing team make amazing designs that can fulfill your dream of having a unique brand recognition and identity.

Theme & Integration

Committed to delivering versatile web development services with full customer contentment, we give a true value to your project, your investment with the execution of enterprise-class theming & integration services. Our professional team is admired globally to fulfill clients' complex needs thoroughly.

ERP Solutions

The more ERP applications and vendors you use, the greater the cost in desktop and technical support, training, development, security and maintenance. In addition, data integrity issues and delays in access and reporting can arise. We understand this and hence emphasize on providing a fully featured ERP system hosted on web to provide you best solutions and help you achieve the best and reduce the time, effort and risk associated with the operations.

Desktop App Development

Our desktop application development services provide you with an efficient, user-friendly, and customized desktop application that can run offline and independent of web-browser. Our desktop applications help businesses meet their respective requirements and provide a competitive advantage in the growing market. As different businesses have specific and unique requirements, our custom-developed desktop applications help businesses to fulfill these requirements and achieve success.

Our Service

Blockchain & IOT Development

Our designing team helps you enhance your design that will bring professionalism in the business image & optimize marketing.

Salesforce Development

We have the experience to understand the way of business integration that's why we provide customizable Salesforce Development services.

Web Development

Our team of web developers helps your business stand out of the crowd in the online marketplace by providing brilliantly designed website.

Mobile App Development

We have expertise in multifarious apps development that will be helpful in propelling the business in online marketplace.

Web Design

We can create pixel perfect and responsive web design for our client's business website, so they can get more customers and generate leads.

ERP Solutions

Our expertise in ERP solutions have enabled our clients to manage and propel forward their enterprise planning in new ways.

Vision

We are committed to providing state-of-the-art web, mobile and blockchain development services to our clients worldwide. Backed by a team of highly skilled and experienced developers, we are able to extend such services using the most cutting edge technologies. We follow a structured process of development and offer timely project delivery.

-Team PreCloud.

Process

01

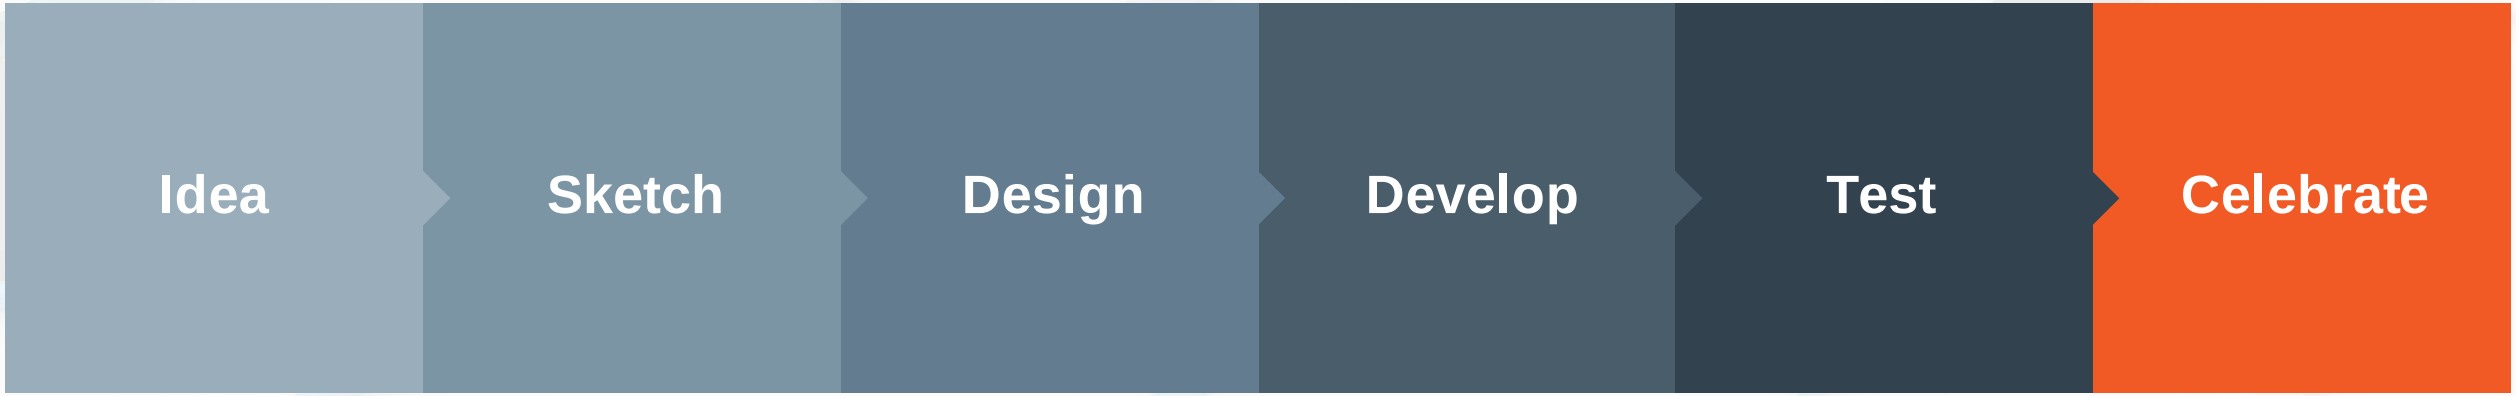
To analyze the requirement through in-depth research with the help of brilliant tools.

03

After completing feasibility test, a final design is prepared by using smart tools.

05

In testing phase, we test every component to make sure that our solution fits the requirement.



02

To draft the design that is related to the research in order to check the feasibility.

04

Now, our the development team starts developing the solution according to design.

06

We make delivery for the solution and assist our clients to control and administer solution.
